### 1. Introduction

The Regional Conference on Chemical Engineering (RCChE) is an annual program to share the most updated technology and research of regional common issues as well as to publicize research work of AUN/SEED-Net members. With similar purposes, the Vietnam National Chemical Congress (VNCC) and National Conference on Chemical Engineering (VNCCE) organized every two years are considered the most important events for Vietnamese chemical and chemical engineering associations. These conferences have given various opportunities for participants to discuss future collaborations and activities related to chemistry and chemical engineering fields.

This year, Hanoi University of Science and Technology is honoured with the mission of being the host for all three of the 8<sup>th</sup> RCChE, the 7<sup>th</sup> VNCC and the 2<sup>nd</sup> VNCCE. To extend more collaboration opportunities for participants, these conferences will be held together on Nov 29<sup>th</sup> – Dec 1<sup>st</sup>, 2015 at Ta Quang Buu Electronic Library Building, located at HUST campus, Hanoi, Vietnam. The conferences will focus on the latest developments in:

- (1) Chemical Process Engineering (CPE)
- (2) U-I Collaboration in Chemical Engineering and Mineral Processing (ICE)
- (3) Catalysis and Adsorption (CAT)
- (4) Bio-fuels and energy (ENG)
- (5) Organic Chemistry and Natural Products (NAT)
- (6) Ceramic, Advanced Materials and Nanotechnology (MAT)
- (7) Polymer Materials and Processing (PLM)
- (8) Environmental Engineering (ENV)
- (9) Food and Biotechnology (BIO)

With the enriching insights from invited speakers who will come from AUN/SEED-Net’s Japanese Supporting Universities, Vietnamese universities, institutes and industries, as well as invited international institutions, we believe that the 8<sup>th</sup> RCChE, the 7<sup>th</sup> VNCC and the 2<sup>nd</sup> VNCCE will open more channels for productive collaborations among the countries in the fields of chemistry and chemical engineering.
